supp		all that apply. All criteria must be met for approval. To a, including lab results, diagnostics, and/or chart notes, must be			
Init	tial Authorization: 12 months				
	Member is 18 years of age or older				
	Medication is prescribed by or in cons	ultation with a hepatologist or gastroenterologist			
	Member has a diagnosis of nonalcohol steatohepatitis (NASH/MASH)	lic steatohepatitis or metabolic dysfunction-associated			

(Continued on next page)

	Provider must submit <u>ONE</u> of the following						
	□ Biopsy results (completed within the last 6 months) documenting BOTH of the following:						
	☐ Liver fibrosis stage F2 or F3						
	□ Non-alcoholic fatty liver disease activity score (NAS) of ≥ 4 with a score of ≥ 1 in all the following: steatosis, ballooning, and lobular inflammation						
	Liver fibrosis stage F2 or F3 as determined by an elastography test, such as vibration-controlled transient elastography (i.e., FibroScan), magnetic resonance elastography (MRE), shear wave elastography; etc. (must submit current test results)						
	In cases of indeterminate fibrosis stage (i.e., inconsistency between fibrosis stage and clinical presentation), a liver biopsy will be required to be submitted						
	Member has three or more of the following metabolic risk factors that are managed according to standard of care (verified by medical chart notes, lab test results and/or pharmacy claims):						
	□ Central obesity						
	□ Hypertriglyceridemia						
	□ Reduced high-density lipoprotein cholesterol						
	□ Hypertension						
	☐ Elevated fasting plasma glucose indicative of diabetes or pre-diabetes						
	Current liver function (CMP) and CBC test results must be submitted						
	Other causes of liver disease or hepatic steatosis have been ruled out (i.e., alcoholic steatohepatitis, acut fatty liver, autoimmune hepatitis, Hepatitis A, B or C, hemochromatosis, drug-induced liver disease)						
	Member has adopted liver-protective lifestyle interventions such as optimizing weight loss, dietary changes, and exercise						
	Member does <u>NOT</u> have significant alcohol consumption (alcohol consumption of more than 20 g per day for women and more than 30 g per day for men)						
	Member does <u>NOT</u> have evidence of cirrhosis, hepatic decompensation, or hepatocellular carcinoma (must submit documentation)						
suppo	thorization: 6 months. Check below all that apply. All criteria must be met for approval. To t each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be ed or request may be denied.						
	Member continues to meet ALL initial authorization criteria						
	Member has experienced <u>ONE</u> of the following as determined by an elastography test, such as vibration-controlled transient elastography (e.g., FibroScan), magnetic resonance elastography (MRE), shear wave elastography or biopsy: MASH/NASH resolution <u>AND</u> no worsening of fibrosis 						
	□ No worsening of MASH/NASH $\underline{\mathbf{AND}}$ improvement in fibrosis by ≥ 1 stage
