AvMed

MEDICAL PRIOR AUTHORIZATION/STEP-EDIT REQUEST*

<u>Directions:</u> The prescribing physician must sign and clearly print name (preprinted stamps not valid) on this request. All other information may be filled in by office staff; <u>fax to 1-877-535-1391</u>. No additional phone calls will be necessary if all information (including phone and fax #s) on this form is correct. <u>If information provided is not complete, correct, or legible, authorization can be delayed</u>.

<u>For Medicare Members:</u> Medicare Coverage for outpatient (Part B) drugs is outlined in the Medicare Benefit Policy Manual (Pub. 100-2), Chapter 15, §50 Drugs and Biologicals. In addition, National Coverage Determination (NCD) and Local Coverage Determinations (LCDs) may exist and compliance with these policies is required where applicable. They can be found at: https://www.cms.gov/medicare-coverage-database/overview-and-quick-search.aspx. Additional indications may be covered at the discretion of the health plan.

Ophthalmic Corticosteroid Injections (MEDICAL)

Drug Requested: (Check box bel	low that applies.)		
□ Ozurdex [®] (dexamethasone intravitreal implant) (J7312)	□ Iluvien® (fluocinolone acetonide intravitreal implant) (J7313)	□ Xipere [™] (triamcinolone acetonide injectable suspension) (J3299)	
MEMBER & PRESCRIBER	INFORMATION: Authorization	n may be delayed if incomplete.

Note: AvMed considers the use of concomitant therapy with Dextenza®, Ozurdex®, Iluvien®, Retisert®, Xipere™, or Yutiq®, to be experimental and investigational. Safety and efficacy of these combinations have NOT been established and will NOT be permitted. In the event a member has an active Dextenza®, Ozurdex®, Iluvien®, Retisert®, Xipere™, or Yutiq® authorization on file, all subsequent requests for an additional ophthalmic corticosteroid injection will NOT be approved.

CLINICAL CRITERIA: Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

	Member was diagnosed with ONE of the following:
	☐ Macular Edema following branch retinal vein occlusion (BRVO) or central retinal vein occlusion (CRVO)
	□ Non-infectious uveitis affecting the posterior segment of the eye
	□ Diabetic Retinopathy
	□ Other:
	zurdex® (dexamethasone implant) 0.7 mg intravitreal injection Check below all that
	oply. All criteria must be met for approval. To support each line checked, all documentation,
	cluding lab results, diagnostics, and/or chart notes, must be provided or request may be denied.
1 box	of 0.7 mg implant(s) = 7 billable units
NDC	: 00023-3348-xx
Quar	ntity Limit: 1 implant (per eye) every 4 months
Max	Units (per dose overtime): 7 billable units (per eye) every 4 months
<u>Initi</u>	al Authorization: 12 months
	Member has been diagnosed with ONE of the following labeled indications
	Member has been diagnosed with <u>ONE</u> of the following labeled indications ☐ Diabetic macular edema (DME)
	□ Diabetic macular edema (DME)
	 □ Diabetic macular edema (DME) □ Macular edema following BRVO or CRVO
-	 □ Diabetic macular edema (DME) □ Macular edema following BRVO or CRVO Member is at least 18 years of age
<u> </u>	 □ Diabetic macular edema (DME) □ Macular edema following BRVO or CRVO Member is at least 18 years of age Member does NOT have any ocular or periocular infections
_ 	 □ Diabetic macular edema (DME) □ Macular edema following BRVO or CRVO Member is at least 18 years of age Member does NOT have any ocular or periocular infections Member does NOT have glaucoma or use medications to treat glaucoma
0	□ Diabetic macular edema (DME) □ Macular edema following BRVO or CRVO Member is at least 18 years of age Member does NOT have any ocular or periocular infections Member does NOT have glaucoma or use medications to treat glaucoma Member does NOT have uncontrolled diabetes (A1c > 10%) Medication will NOT be used in combination with other sustained-release intravitreal corticosteroids

Ophthalmic Corticosteroid Injections (Medical) (AvMed) (Continued on next page)

	Member does \underline{NOT} have a history of steroid-induced increased intraocular pressure (IOP > 23 mmHg) in treatment eye(s)
	Member has a contraindication to bevacizumab intravitreal injection
a	Dzurdex® (dexamethasone implant) 0.7 mg intravitreal injection Check below all that pply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.
Rea	uthorization: 12 months
	Member has <u>NOT</u> experienced serious side effects related to toxicity (e.g., increased intraocular pressure, endophthalmitis, conjunctival hemorrhage)
	Member has NOT had a loss of visual acuity from baseline
	Member does NOT have a hypersensitivity to dexamethasone
tł	luvien® (fluocinonide acetonide implant) 0.19 intravitreal injection. Check below all nat apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.
1 bo	x 0.19 mg implants = 19 billable units
NDC	C: 68611-0190-xx
Qua	ntity Limit: 1 implant (per eye) every 36 months
Max	Units (per dose overtime): 19 billable units (per eye) every 36 months
Init	ial Authorization: 36 months
	Member has been diagnosed with Macular edema following BRVO or CRVO
	Member is at least 18 years of age
	Member does NOT have any ocular or periocular infections
	Member does \underline{NOT} have glaucoma with a cup to disc ratio > 0.8
	Member does NOT have glaucoma or use medications to treat glaucoma
	Member does \underline{NOT} have uncontrolled diabetes (A1c > 10%)
	Medication will <u>NOT</u> be used in combination with other sustained-release intravitreal corticosteroids (e.g., fluocinonide acetonide implant)
	Member's best corrected visual acuity (BCVA) is measured at baseline and will be measured periodically during treatment
	Baseline best corrected visual acuity (BCVA) measured:
	Member does \underline{NOT} have a history of steroid-induced increased intraocular pressure (IOP > 23 mmHg) in treatment eye(s)
	Member has a contraindication to bevacizumab intravitreal injection

□ Iluvien® (fluocinonide acetonide implant) 0.19 intravitreal injection. Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.
Reauthorization: 36 months
☐ Member has experienced disease response indicated by improvement of best corrected visual acuity (BCVA) score once compared to baseline
☐ Member has <u>NOT</u> experienced serious side effects related to toxicity (e.g., increased intraocular pressure, endophthalmitis, conjunctival hemorrhage)
☐ At least 36 months has passed since last Iluvien® intravitreal injection was administered (of the same eye)
□ Xipere [™] (triamcinolone acetonide injectable suspension). Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.
1 single dose vial (SDV) = 36 billable units
NDC: 71565-0040-xx
Quantity Limit: 1 vial (per eye) every 12 weeks
Max Units (per dose overtime): 36 billable units (per eye) every 12 weeks
<u>Initial Authorization</u> : 12 months
☐ Member is at least 18 years of age
☐ Member is free of ocular and periocular infections, including but not limited to, active ocular herpes simplex
 Member has <u>NOT</u> received any of the following sustained-release intravitreal corticosteroids: Dexamethasone – within the prior 4 months (i.e. Ozurdex[®])
☐ Fluocinolone acetonide – within the prior 30 months (Retisert®) or 36 months (Iluvien®, Yutiq®)
Member's best corrected visual acuity (BCVA) is measured at baseline and will be measured periodically during treatment
☐ Baseline best corrected visual acuity (BCVA) measured:
☐ Member does <u>NOT</u> have untreated intraocular pressure or uncontrolled glaucoma
☐ Member has macular edema secondary or related to non-infectious uveitis
□ Xipere [™] (triamcinolone acetonide injectable suspension). Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.
Reauthorization: 12 months
