Drug Name/Form/Strength: _____

Dosing Schedule: _____ **Length of Therapy**: _____

Diagnosis: _____ **ICD Code, if applicable:** _____

Weight (if applicable): _____ **Date weight obtained:** _____

Quantity Limit: 1 tablet per day

CLINICAL CRITERIA: Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

Initial Authorization: 12 months

- ❑ Member is 18 years of age or older
- ❑ Member is currently receiving treatment at maximum or maximally tolerated doses with at least **ONE** agent from each of the classes below, unless contraindicated, for the past 4 weeks **(verified by pharmacy paid claims; documentation of intolerances or contraindications must be submitted; check all that apply)**
  - ❑ renin-angiotensin system (RAS) inhibitors (e.g., lisinopril, enalapril, losartan, valsartan)
  - ❑ calcium channel blockers (e.g., amlodipine, felodipine, nifedipine, verapamil)
  - ❑ thiazide/thiazide-like diuretics (e.g., hydrochlorothiazide, chlorthalidone, indapamide)

(Continued on next page)

- ❑ Treatment with a mineralocorticoid receptor antagonist (spironolactone, eplerenone) has been added to the existing antihypertensive regimen and was ineffective, intolerable, or is contraindicated **(verified by pharmacy paid claims; documentation of intolerance or contraindication must be submitted)**
- ❑ Treatment with an additional antihypertensive agent with a different mechanism of action (e.g., hydralazine, minoxidil, clonidine, prazosin, metoprolol) has been ineffective, or are all contraindicated **(verified by pharmacy paid claims; documentation of intolerance or contraindication must be submitted)**
- ❑ Provider must list the member's current prescribed antihypertensive drug regimen:

  _____

  _____

- ❑ Member has been adherent to prescribed antihypertensive drug regimen for at least 4 weeks prior to the date of the blood pressure reading recorded in chart note documentation **(adherence will be verified by pharmacy paid claims)**
- ❑ Provider has evaluated the member for causes of pseudoresistance (e.g., inaccurate blood pressure readings, white coat hypertension, secondary hypertension, non-adherence to medication) and confirms that pseudo-resistant hypertension has been ruled out
- ❑ Member has resistant hypertension as demonstrated by blood pressure above 130/80 mmHg, despite adherence to prescribed antihypertensive drug regimen **(submit documentation of blood pressure reading recorded within 30 days of request)**
- ❑ For patients who can become pregnant, all provider and patient-specific requirements of Tryvio™ REMS have been satisfied
- ❑ Provider attests baseline liver function tests and hemoglobin levels have been obtained and will be monitored periodically or as clinically indicated

Reauthorization: 12 months. Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

- ❑ Member's blood pressure has reduced from baseline after initiating therapy with Tryvio™ **(submit documentation)**
- ❑ Member is adherent to Tryvio™ and continues to receive Tryvio™ in addition to background antihypertensive drug therapy **(verified by pharmacy paid claims)**
- ❑ Provider attests hemoglobin and liver function tests continue to be monitored

Medication being provided by Specialty Pharmacy – Proprium Rx

Use of samples to initiate therapy does not meet step edit/ preauthorization criteria.
Previous therapies will be verified through pharmacy paid claims or submitted chart notes.
