

Tracking Medications

Do you take a lot of medications? The pink one for blood pressure. The round one for cholesterol. Plus fish oil. Keeping track of all these pills can get confusing. And medications can sometimes interact with each other and cause side effects.

Our Medication Therapy Management (MTM) program can help you keep track of your medications and supplements. You'll speak one-on-one with a pharmacist who will work with you and your doctor to make sure you're taking medications that are safe, appropriate, and affordable.

You will be automatically enrolled in the MTM program, at no cost, if you meet all three of the following conditions:

1. You take eight or more prescription medications covered by Medicare Part D
2. You have at least three of the eight following conditions:
 - Asthma
 - Chronic Heart Failure
 - COPD
 - Diabetes
 - Dyslipidemia
 - HIV/AIDS
 - Hypertension
 - Osteoarthritis
3. Reach annual prescription medication costs of \$4,376, which is calculated based on the previous quarter Part D medication costs, greater than or equal to \$1,094.
